9.97-Megawatt Natural Gas-Fired Power Plant Amendment
Proceeding 30379
Application 30379-A001

Power plant amendment and time extension

1. Athill Tech Solution Ltd., by Application 30379-A001, registered with the Alberta Utilities Commission on October 21, 2025, requested approval to amend the power plant approval into two separate phases (Phase 1 and Phase 2) and to extend the completion date of Phase 2 of the power plant.

2. The proposed work is related to facilities previously approved by the Commission in Approval 30144-D02-2025,[1] where November 30, 2025, was stipulated as the completion date for the power plant. The Commission originally approved the project on November 23, 2023, and has approved two time extensions to construct the power plant since that time.

3. Athill stated that Phase 1 shall consist of three 1.475-megawatt (MW) natural gas-fired generators for a total generating capability of 4.425 MW and Phase 2 shall consist of three 1.475-MW natural gas-fired generators and one 1.12-MW natural gas-fired generator for a total generating capability of 5.545 MW.

4. Athill confirmed that Phase 1 of the power plant was commissioned on October 30, 2025.

5. Athill stated that it was not able to install Phase 2 of the power plant as it encountered issues with Phase 2 equipment. Athill noted that the replacement units have been secured and are undergoing the required overhaul to comply with the updated electrical and Canadian Standards Association pipe safety code requirements for above-ground pipe.

6. Athill expects that the overhaul work and onsite installation of the Phase 2 equipment will be complete by the end of February 2026. Athill requested a construction completion date of March 31, 2026, in the power plant approval for Phase 2.

[1] Power Plant Approval 30144-D02-2025, Proceeding 30144, Application 30144-A001, July 23, 2025.

7. Athill confirmed that the project wildlife survey remains valid. It added that as the project has not undergone any changes, there is currently no requirement to conduct any additional wildlife assessment work at this time.

8. Athill stated that due to the minor nature of the application and the location of the facility being next to an existing gas processing facility, it did not send out an additional notification. However, it confirmed that no land titles have changed since the participant involvement program was previously completed and no concerns were raised with respect to the project by stakeholders at that time.

9. Based upon the information provided, the Commission is satisfied that the proposed amendment to the power plant is of a minor nature, no person is directly and adversely affected by the proposal, and no significant adverse environmental impact will be caused by the proposed work. The Commission approves the request to amend the power plant approval into two separate phases (Phase 1 and Phase 2).

10. Athill has provided information respecting the need, nature and the duration of the requested time extension for Phase 2 of the power plant. Based upon the information provided, Athill has demonstrated that the requested time extension for Phase 2 of the power plant is of a minor nature. The Commission approves a time extension to March 31, 2026, for the completion of Phase 2 of the power plant.

11. Approvals 30379-D02-2025 and 30379-D03-2025 are attached.

12. The Commission may, no later than 60 days from the date of this decision and without notice, correct typographical, spelling and calculation errors and other similar types of errors and post the corrected decision on its website.
